

Marcello Bevilacqua

MIDTERM PROPOSAL

My website is going to be a portfolio type website that is an art piece of its own in a way. It's going to consist of a welcome page that introduces the content and is a peek into the world they'll be entering. Then once inside the website a colorful map that is reminiscent of a vintage Disneyland map will guide them through the areas of my creative mind. There will be performance design, portraits, films, and a photo vault to browse through. I am also including an inspiration tab to give them a peek into my creative process and where I am drawing my inspiration from at any given time. Of course there will be a contact and about tab as is standard with most websites. I am creating this website as a way to organize my art in a way that is aesthetically pleasing to me and makes me happy.
